- 2 inputs for external kick and hi-hat pedals (sold separately)
- Stereo input to play along with your CD or MP3 player
- MIDI output to play external MIDI devices
- High-quality 24-bit stereo and headphone outputs
- Lightweight, durable enclosure

Performance Pad brings together quality feel and legendary drum sounds for the perfect all-in-one percussion station.

Complete All-in-One Percussion Station. Performance Pad features eight velocity-sensitive drum pads and a built-in electronic drum machine with professional sounds and features. You can create and record your own beats from scratch or play along with the built-in patterns. With Performance Pad, you can practice quietly with headphones, or plug into an amplifier.

Performance Pad includes inputs for a kick drum pedal, hi-hat pedal, and a line-level input to connect a CD Player, iPod, computer, or other audio device so that percussionists can play along with nearly any recorded mix. Built-in rhythm patterns are also included to complement playing.

Dynamic Articulation™ technology is included to add nuance to the feel of every drum hit. In addition, there are industry-standard mounting holes on the bottom for easy attachment to an existing drum kit rack.

The 24-bit, high-quality headphone output on the Performance Pad ensures a no-compromise playback experience without disturbing others. Connection to keyboards and sound modules is made simple thanks to the integrated MIDI output.
